Kobe Steel, Ltd. Tokyo, Japan Tokyo Stock Exchange No. 5406 May 22, 2003

KOBE STEEL'S CONSOLIDATED FINANCIAL RESULTS FOR FISCAL 2002 (April 1, 2002-MARCH 31, 2003)

Kobe Steel, Ltd. reported today its financial results for fiscal 2002, ended March 31, 2003.

CONSOLIDATED FINANCIAL SUMMARY

(in millions of yen)	FY2002	FY2001	% Change
Net sales	1,204,749	1,198,014	0.6%
Operating income	81,053	35,499	128.3%
Ordinary income (loss)*	35,442	(13,548)	
Net income (loss)	1,723	(28,518)	
Earnings per share	0.59 yen	(10.06 yen)	

NON-CONSOLIDATED FINANCIAL SUMMARY

(in millions of yen)	FY2002	FY2001	% change
Net sales	807,231	793,952	1.7%
Operating income	52,258	30,410	71.8%
Ordinary income*	20,263	(4,010)	
Net income (loss)	(4,859)	(20,991)	
Earnings per share	(1.67 yen)	(7.39 yen)	

Notes: * Also known as pretax recurring profit (or loss) Figures in parentheses denote losses.

SEGMENT SALES (in millions of yen)

	FY2002	FY2001
Iron & Steel	523,474	486,383
Aluminum & Copper	248,040	256,541
Machinery	216,216	232,211
Construction Machinery	157,398	148,304
Real Estate	42,589	45,046
Other Businesses	56,369	82,160
Eliminations	(39,339)	(52,634)
Consolidated net sales	1,204,749	1,198,014

OVERSEAS SALES (in millions of yen)

	FY2002	FY2001
Overseas sales	248,935	235,799
Consolidated net sales	1,204,749	1,198,014
% overseas sales	20.7%	19.7%

PRODUCTION (in metric tons)

	FY2002	FY2001	% change
Crude steel	6,918,000	6,563,000	5.4%
Rolled aluminum products	410,000	385,000	6.5%
Rolled copper products	113,000	106,000	5.8%

OVERALL PERFORMANCE

The Japanese economy in fiscal 2002, ended March 31, 2003, continued to be weak. Although the economy picked up owing to higher exports mainly to Asia, the decelerating U.S. economy, sluggish private-sector capital investment, and dull personal spending exerted deflationary pressures.

On this background, Kobe Steel, Ltd.'s consolidated net sales for fiscal 2002 rose 6.7 billion yen to 1,204 billion yen. Although sales were affected by the transfer of equity in an IT systems_subsidiary, sales were bolstered by the commercial start of the wholesale electricity supply business. Pretax ordinary income rose to 35.4 billion yen, from a loss of 13.5 billion last year, owing to the wholesale electricity supply business and lower overall costs in the materials business. Extraordinary losses – centered on the change in new accounting standards for retirement benefits and a write-down of securities in the weak stock market – brought aftertax net income to 1.7 billion yen.

DIVIDENDS

As Kobe Steel continued to have undisposed deficits in fiscal 2002, it is unable to distribute dividends in accordance with the Commercial Code. The Company regrets this situation and asks its shareholders for their understanding and continued support.

PERFORMANCE BY BUSINESS SEGMENT

IRON & STEEL

Domestic steel demand was firm owing to strong auto and other exports. However, capital investment and construction investment remained weak and the overall market continued to be severe. Exports were strong owning to a sharp recovery in the Asian market, particularly China. The strong demand supported price increases, and domestic inventories also returned to appropriate levels. As a result, the market mainly for steel sheet improved.

Kobe Steel's vigorous marketing efforts led to a rise in shipments both in Japan and overseas. With the start of the wholesale electricity supply business, segment sales rose 7.6% to 523.4 billion yen. Operating income increased by 37.4 billion yen to 48.7 billion yen. In addition, the segment benefited from a reduction in overall costs.

ALUMINUM & COPPER

Shipments of rolled aluminum products increased over the previous fiscal period. Demand for aluminum sheet, in particular can stock for beverages, went up. Shipments rose for aluminum used in growing amounts in the automotive sector and for semiconductor manufacturing equipment owing to recovery in the IT industry. Shipments of rolled copper products also increased. Although domestic shipments of copper tube went down as air conditioner manufacturers continued to shift production overseas, copper strip for semiconductor leadframes and automotive electrical terminals was strong.

Although sales of rolled aluminum products increased, Kobe Steel's withdrawal from aluminum ingot businesses contributed to a 3.3% decrease in segment sales to 248 billion yen. Operating income rose 4.4 billion yen to 12.4 billion yen owing to higher shipments and lower overall costs.

MACHINERY

Domestic Machinery segment orders fell 20.5% to 114.1 billion yen due to the large drop in municipal solid waste treatment plants. Overseas, the contract for a pellet plant became effective, and orders for compressors and tire machinery were firm, leading to a 78.6% increase to 41.3 billion yen. Total orders went down 6.7% to 155.5 billion yen and the backlog of orders was 148.9 billion yen.

Segment sales went down 6.9% to 216.2 billion yen due to lower sales from consolidated subsidiaries. Operating income went up by 500 million yen to 4.2 billion yen.

CONSTRUCTION MACHINERY

The domestic market continued to slide due to the slump in public works, housing starts and construction. Overseas, the economic slowdown in North America and Europe led to lower demand. On the other hand, demand in the Chinese market continued to be strong due to a sharp upturn in infrastructure improvements.

As a result, in the Construction Machinery segment domestic demand for new construction equipment was weak, but the overseas market was strong, in particular leading to a substantial production increase in China. As a result, segment sales rose 6.1% to 157.3 billion, while operating income went up 2.2 billion yen to 4 billion yen.

REAL ESTATE

Real estate conditions were difficult in fiscal 2002. Despite low mortgage rates and the extension of tax breaks for new home purchases, real estate demand declined as buyers were reluctant to make purchases in the stagnant economy.

In the Real Estate segment, sales were good for large developments such as the Maya Seaside Place East condominium in Kobe. However, the number of empty rooms increased in the rental business and market prices remained low in the brokerage and remodeling businesses. As a result, sales went down 5.5% to 42.5 billion yen. Operating income went down 3.6 billion yen to 4.3 billion yen due to changes in the make-up of real estate sales.

OTHER BUSINESSES

The transfer of equity held in an IT systems subsidiary turned it into an affiliate. As a result, sales decreased 31.4% to 56.3 billion yen. Operating income rose 4.8 billion yen to 5.7 million yen due to the strong performance of a semiconductor testing subsidiary.

OUTLOOK FOR FISCAL 2003 (ending March 2004)

The Japanese economy in fiscal 2003, ending March 2004, will continue to be difficult to predict. Due to conditions in the Middle East and other factors, the outlook for the world economy is uncertain. In Japan, capital investment is forecast to be weak and personal spending will be stagnant. Kobe Steel's outlook for its business segments in fiscal 2003 are as follows.

IRON & STEEL

Domestic demand will continue to be sluggish in fiscal 2003. The decline in public works is expected to reduce demand from the construction industry. Car production is expected to go down, and user industries are shifting to overseas markets. Overseas, China and other Asian markets are anticipated to see a rise in demand. However, in addition to a slowdown in the U.S. economy, China's safeguard measures for steel and the SARS outbreak will make it increasingly difficult to chart the Asian economy. In comparison to fiscal 2002, steel demand in fiscal 2003 is forecast to be lower. As a result, Japan's crude steel production is expected to go down.

Due to the above factors, steel demand is expected to decrease. However, as price increases take effect, Kobe Steel anticipates improvements in sales prices. As a result, segment sales are forecast to increase slightly over fiscal 2002 sales.

ALUMINUM & COPPER

Kobe Steel does not foresee strong growth for aluminum used in construction and for can stock. However, aluminum sheet and extrusions for the automotive industry are anticipated to steadily increase. Therefore, demand for rolled aluminum products is anticipated to rise slightly in fiscal 2003. In rolled copper products, demand is expected to increase slightly. Copper strip for semiconductor leadframes is anticipated to go up, while for copper tube, air conditioner manufacturing will continue to shift overseas. Thus, overall demand is expected to increase slightly in comparison to fiscal 2002.

Sales for this segment are anticipated to decrease slightly. While demand for rolled aluminum and rolled copper products is likely to turn slightly favorable, the lower sales from aluminum ingot businesses are expected to affect segment sales.

MACHINERY

In Japan, fewer orders are expected due to fewer public works, while overseas market conditions will continue to be severe. As the handovers of municipal solid waste treatment facilities were concentrated in fiscal 2002, segment sales are forecast to go down.

CONSTRUCTION MACHINERY

Domestic demand for construction equipment is forecast to continue to slacken due to shrinking public works. Overseas, the Chinese market is anticipated to continue growing, but North America and Europe will be affected by decelerating economies.

As domestic demand for new machines is expected to be low, this segment will focus on the stock business of used equipment, parts and maintenance. Overseas, production in China is anticipated to increase. Thus, segment sales are forecast to remain at a similar level to fiscal 2002 sales.

REAL ESTATE

Due to the unclear economic outlook, Kobe Steel does not expect a sharp upswing in real estate purchases. As competition will toughen due to the large supply of condominium units, the business environment will continue to be difficult.

In fiscal 2003, handovers are to take place for the Maya Seaside Place East in Kobe and the O's GARDEN condominium development in Okubo, both in western Japan. As a result, segment sales are anticipated to increase slightly over fiscal 2002 sales.

OTHER BUSINESSES

With the equity transfer of a semiconductor testing subsidiary, sales in this segment are anticipated to decrease in comparison to fiscal 2002.

OVERALL FORECAST

In Iron & Steel, higher steel prices are anticipated to contribute to higher sales. However, in the Machinery segment, sales of municipal solid waste treatment plants will go down sharply, while in the Aluminum & Copper segment and other segments, the exclusion of a number of formerly consolidated subsidiaries is forecast to reduce consolidated sales by 1.2% to 1,190 billion yen. Pretax ordinary income is anticipated to rise to 43 billion yen and aftertax net income is forecast to increase to 14 billion yen. Factors expected to contribute to the higher profits are thorough overall cost reductions and higher prices in the Iron & Steel segment.

ADDITIONAL INFORMATION ON KOBE STEEL'S FISCAL 2002 RESULTS

MANAGEMENT POLICIES

1. FUNDAMENTAL MANAGEMENT STRATEGY

Kobe Steel is focusing on three core fields of business. These areas are 1) materials (steel, welding, aluminum and copper); 2) the independent power producer (IPP) business, which utilizes the infrastructure of the Iron & Steel segment; and 3) the machinery and engineering segments (infrastructure, engineering and machinery). The company intends to improve the corporate value of the entire Kobe Steel group by becoming a unified company centered on high return on assets (ROA) and business units with high cash flow.

Based on this strategy in fiscal 1999 Kobe Steel turned its business divisions into internal companies, appointed corporate officers, and implemented other measures to improve its management structure. One of management's priorities was to quickly and aggressively rebuild the company's business structure to improve ROA. While strengthening the company by channeling management resources into core businesses, Kobe Steel has been divesting businesses without synergy or those that are unprofitable under a policy called selection and consolidation.

2. POLICY FOR DIVIDEND DISTRIBUTION

Subject to its retained earnings and financial performance, the company aims for an early resumption of dividend payments to its shareholders as soon as possible.

To enable an early resumption of dividend payments, Kobe Steel's management plans to reverse a portion of its additional paid-in capital and all of its legal reserve. The use of these funds will be proposed at the Ordinary General Meeting of Shareholders to be held in June.

3. BUSINESS FOCUS

In the Iron & Steel segment, Kobe Steel's business strategy is focused on strengthening products in which it excels: specialty steel, high strength steel, and surface treated steel. In addition, the alliance with Nippon Steel Corporation and Sumitomo Metal Industries, Ltd. is anticipated to further improve its profit-earning capabilities.

In the Aluminum & Copper segment, Kobe Steel is firmly positioned as the top producer of a comprehensive array of aluminum materials and parts to the automotive industry. In particular, the company is focusing on aluminum panel material, demand for which is expected to grow in automotive applications. In rolled copper products, Kobe Steel is promoting copper strip for semiconductor leadframes and automotive connectors and terminals. Carrying out cost reduction measures, the Aluminum & Copper segment is strengthening its profitability.

In the Machinery segment, the Company is maintaining orders in the energy field, a growth area, as well as continuing to lower fixed costs to strengthen its profitability. In addition, new businesses such as soil decontamination and PVC recycling, as well as new product development in compressors will contribute to improved profitability.

Additionally, Kobe Steel intends to channel its management resources into fields in which it excels and promising areas of growth to strengthen its core businesses. Reforms in the profit structure of the Kobe Steel Group are anticipated to build a stable profit base as well as improve financial performance, thus increasing the company's corporate value.

4. CORPORATE GOVERNANCE AND STATUS OF MEASURES

With regard to corporate governance, Kobe Steel introduced an internal company system to improve

the profitability of each business unit and to reform its business structure through the selection and consolidation of its assets.

In 1999, Kobe Steel implemented a system of corporate officers to separate management from business operations. For this purpose, the number of board directors was reduced. Top management and executives responsible for the head office were appointed directors. However, management decision-making and the execution of everyday operations have a close relationship. It became clear that this management system was not in step with the Company's aims. As a result, the Company will present at the Ordinary General Meeting of Shareholders in June that the board of directors shall consist of the top management, executives in charge of major head office functions, other executives in essential businesses, and the internal company presidents.

As for administering the operations, the board directors should have legal responsibility to the Company's shareholders and customers in carrying out the Company's business affairs and this would be the optimum way for shareholders to relegate this responsibility. Consequently, directors would oversee the administration of the business segments, while corporate officers would be responsible for executing the business affairs of the segments. The corporate officers of Kobe Steel are not selected by a company committee; nor are they under a legal organization. The officers are selected by the board of directors and are responsible for carrying out the operations requested of them.

At the Ordinary General Meeting of Shareholders in June, Kobe Steel will propose that one additional outside auditor be added to further improve the company's governance. As a result, the number of auditors will increase to five, and four of them will be outside auditors. It should be noted that the outside directors and Kobe Steel have no business relationships or other interests.

As for the compliance system, in 2000 Kobe Steel established a Corporate Ethics Committee, which includes members from outside the company. This Committee has considered various measures and is implementing them in order to comply with the rules of society and to establish corporate ethics.

In June 2000, the Committee formulated the Corporate Code of Ethics to provide guidelines for business conduct. The guidelines provide parameters for operating within the acceptable norms of society under established laws and regulations. The Code of Ethics not only outlines policies and actions, but also describes corporate behavior and employee expectations, including contributing to society and creating a work environment that fosters employee individuality and creativity.

In October 2001, the company established risk management standards to improve its capabilities to deal with risks faced by its businesses. The standards systematically organize risks and set risk prevention measures, monitoring systems, and responsibility systems.

In addition, a Compliance Ad Hoc Committee, which includes outside lawyers, was organized. The Committee has been preparing to create a system to achieve compliance management to uphold the law. The Ad Hoc Committee, which began in July 2002, has met seven times. In March 2003, the Committee produced a report proposing the rebuilding of the compliance system.

Kobe Steel intends to implement the proposals. In concrete terms, in progressively reorganizing the Corporate Ethics Committee, a permanent Compliance Committee, of which the majority of the members will consist of outside members, will serve as the advisory body to the board of directors. The Committee would have the power to advise the board of directors to take action against violations of the law. The Company intends to further strengthen its personal and qualitative functions of departments responsible for overseeing compliance. In addition, one outside lawyer will be placed in the Kanto region as well as one in the Kansai region of Japan. The lawyers will be appointed upon the recommendation of the Bar Association. This will create a system for internal notification.

Through these measures, Kobe Steel is promoting corporate governance and the establishment of a thorough compliance system.

1. SUMMARY OF FISCAL 2002 CONSOLIDATED RESULTS (April 1, 2002-March 31, 2003)

(in millions of yen)	FY2002	FY2001	% change FY02/01

NOTICE ON REVERSAL OF STATUTORY RESERVES

Kobe Steel, Ltd. hereby gives notice that the reversal of the statutory reserves of the Company is to be proposed at the 150th Ordinary General Meeting of Shareholders, which will be held on June 25, 2003, by the resolution reached at the meeting of the Board of Directors held on May 22, 2003. The details are stated below.

PARTICULARS

1. PURPOSE OF REVERSAL OF THE STATUTORY RESERVES

- 1) It is proposed that the undisposed deficits of the Company be eliminated by the reversal of a portion of the additional paid-in capital in accordance with Subarticle 1 of Article 289 of the Commercial Code of Japan.
- 2) It is also proposed that the legal reserve be reversed in order to prepare for a payment source for dividends and the execution of a flexible and efficient capital procurement strategy in accordance with Subarticle 2 of Article 289 of the Commercial Code of Japan.

2. AMOUNT OF THE REVERSAL OF THE STATUTORY RESERVES

- 1) The amount of the reversal of the additional paid-in capital: 72,727,470,490 yen
- 2) The amount of the reversal of the legal reserve: 28,363,116,569 yen

3. SCHEDULE OF THE PROCEDURES

- 1) The date of the Meeting of the Board of Directors when this item was resolved: May 22, 2003
- 2) The date of the 150th Ordinary General Meeting of Shareholders: June 25, 2003

The legal reserve will be effectively reversed in late July 2003 after the expiration of the duration that enables creditors to formally raise objections on the reversal.
