

Greencote® GX Process Series

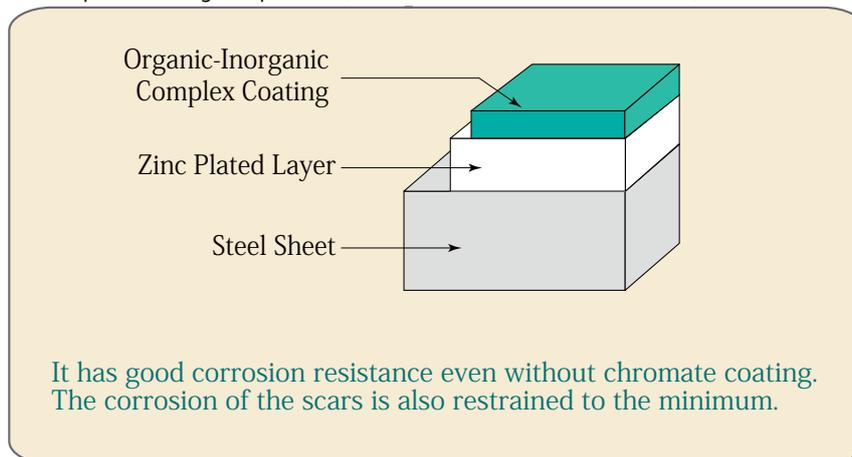

Environment-Friendly Coated Steel Sheet that does not Contain Hexavalent/Trivalent Chrome

Outline

Environment-Friendly Coated Steel Sheet that does not Contain Hexavalent/Trivalent Chrome

Electro-Galvanized Steel Sheet	Hot-Dipped Galvanized Steel Sheet	Pre-coated Steel Sheet
ZINKOBELLA GX	Galva-Ace GX	Kobe Pre-coat GX

■ Example of coating composition (Kobe Zinc Green Coat GX-K2 Process)

Characteristics

- (1) It is not coated with chromate.
→Chemical-Conversion Treated Steel Sheet that does not contain Hexavalent/Trivalent Chrome
- (2) Its corrosion resistance is as strong as that of conventional chromated ones.
- (3) It has excellent fingerprint resistance.
- (4) It has good lubricity.
- (5) It has good coating adhesion properties.
- (6) It has good conductivity.

Examples of Use

- TV
- Audio-Visual Devices (chassis, mechanical devices)
- Photocopiers, Printers
- Computer Cases
- Household Appliances (Washing Machines, Refrigerators, Air Conditioners)

Environmental Consideration

It reduces emissions of hazardous material by using steel sheet that do not contain hazardous material, thereby contributing to environmental conservation.
