Effect

A solution is proposed by utilizing our elemental technology. It has contributed to cost reductions and less engineering.

Examples of Heat Simulation

The effect of heat radiation when Kobe Honetsu is applied can be simulated.

Heat analysis of DVD Recorder (effect of heat radiation)

Galvanized Steel Sheet

Surface Temperature Distribution of Top Cover

Kobe Honetsu

Temperature Distribution In Internal Parts

Examples of Electromagnetic Wave Simulation

Electromagnetic wave leakage and field intensity can be measured.

Electromagnetic Wave Leakage Increased by Resonance

Field Intensity to Joint of Steel Sheets

Measured at Side Face of DVD Case (Related to Resonance Frequency Corresponding to Shape of Case)
